Overview

Changes in version 9.12 build 34 BETA relative to version 9.12 build 10	2
Changes in version 9.12 build 10 BETA relative to version 9.10 build 55	2

Changes in version 9.12 build 34 BETA relative to version 9.12 build 10

1. The configuration group "VPN IP Networks" has been renamed to "Split Tunneling".
2. The configuration wizard now directly allows for new profiles to be assigned to a to a profile filter group.
3. Configuration export of a selected profile with the VPN client's monitor.
4. Optimized display of scanned WiFi networks.
5. French and Polish language have been added to the setup routine.
6. The maximum number of Remote VPN Networks has been increased to 250.
7. General improvements of IPsec compatibility.
10. Improved behavior of the disconnected client with DHCP and manual Connection mode enabled. Previously the client applied a 0.0.0.0 IP address on the NCP adapter. With the client being disconnected its adapter is now announced as "Media disconnected" in the OS. As a result the client connection is faster.

Changes in version 9.12 build 10 BETA relative to version 9.10 build 55

1. Compatible with Microsoft Windows 7 BETA 32/64 bit.
2. Improved data throughput on 64 bit Windows platforms.
3. Improved processing of application related rules within the client's personal firewall.
4. Improved handling of language selection in the client's GUI.
5. Improved graphical feedback while scanning or connecting to WIFI networks.
6. Import option of configuration files directly in the client's configuration wizard to create new profiles.
7. Improved log handling. When highlighting a line in the monitor's log, the log stops scrolling which allows for better log viewing.
8. Added Diffie-Hellmann-Group 14 to the IPsec IKE proposals.
9. Added SHA-256, SHA-384 and SHA-512 to IPsec IKE proposals.
