Release Notes

NCP Secure Enterprise HA Server

for Linux

Major release: 14.00 r32190
Date: December 2025

Prerequisites

Linux distribution

The following Linux distributions are supported with this release:

- SUSE Linux Enterprise Server 15
- Red Hat Enterprise Linux 10 (x86-64)
- Debian GNU/Linux 13 (x86-64)

Requirements for operating the NCP Secure Enterprise HA Server (HAS)

The following versions are required for using other NCP components:

- Secure Enterprise Management Server (SEM) Version 8.10 or newer
- Management Console Version 8.00 or newer
- Management Plug-in Server Configuration Version 14.00 or newer
- Secure Enterprise VPN Server Version 14.00 or newer

1. New features and enhancements

Number of SES instances in the HA cluster

The previous limitation on the maximum number of SES instances supported in the HA cluster has been removed.

IKEv2 Redirect – Requests from internal networks

Unlike load balancing with NCP's own HA protocol, IKEv2 redirect previously did not distinguish between external client requests and requests from configured internal networks.

2. Improvements / Problems Resolved

None.

3. Known Issues

None.

4. Getting Help for the NCP Secure Enterprise HA Server

To ensure that you always have the latest information about the NCP Secure Enterprise HA Server, always check the NCP website at:
